PREAMBLE: Thank you for receiving us in your theatre, the following datasheet has to be honoured scrupulously. Obviously some elements may be discussed. Please feel free to contact me for further details.

Please be aware that the technical installation takes minimum 10 hours, this means one full day before the first performance. Also, a 1 hour rehearsal is needed 3 hours before playing.

Please contact us to discuss about the requirements for your place.

PERFORMANCE :

- **Visual Circuit** for adults and teenagers (from 12 years old)
- Duration of the show: 60min
- Audience: 40 people (we play 2 or 3 times a day).
- Crew: 1 actress (vegetarian) / 1 technician / 1 tour manager

INSTALLATION:

- Setup 10 hours with one light technician and one sound technician of the theatre.
- Disassembling and loading 3 hours with two technicians of the theatre
- During the show we need one technician to be present

STAGE SPACE :

- **Adjustable scene** : 150m² minimum (opening minima 5m)
The stage doesn't need a grill, can be played in any indoor place, even in several places nearby, as it's a circuit.

- **TOTAL BLACK**

- Height under grid : 3,50 meters with a possibility to install a videoprojector at 3m.
- Black walls - curtains (legs) or pendrillons (except for the special's place (ex: church, tunnel,

wall with stone ...)

- Technical ward (Regie) on the stage (to see at arrival)
- Black sheep-dip for the audience entrance
- "6 weights of 15kg each and 4 of 10kg to ballast the scenery
- A water point near de stage
